When it comes to demonstrating sheer performance, no one outshines Canon. Our REALiS and LV Series Multimedia Projectors are powerful proof of how Canon's focus on the optical sciences results in outstanding projection technology.

Using revolutionary LCOS technology, Canon projectors will display your images in ways that leave your audiences amazed. LCOS stands for Liquid Crystal on Silicon — a technology whose high aperture ratio allows for the reproduction of seamless images.

The benefits of Canon AISYS-enhanced LCOS technology will absolutely floor you. Astoundingly accurate image reproduction. Print legibility down to 7-point type. Breathtaking colors in crisp, exquisite and

pixel-free clarity and detail. Offering a significantly larger display area, our WUXGA and SXGA+ projectors allow you to view more data than either XGA or WXGA. For performance you have to see to believe, step up to the new reality. Step up to REALiS projectors.

REALiS

Take your presentation to the LCOS extreme – with Canon REALiS Projectors

At the heart of our LV Multimedia Projectors lies the amazing combination of illumination and flexibility. Among its many advantages: dramatic image reproduction, razor-sharp projection in short and long range and remarkable resolution and contrast — all with minimal internal reflection, flare or ghosting. User-friendly features like easy lamp replacement, sleek ergonomic design and convenient carrying handle round out the refined functionality of our newest models.

Sharpen your performance with LCD projection:  
The Canon LV Series

An ideal balance of consistency, color and image clarity make the Canon LV Series ideal for many venues.
